Precipitation probability					
10%	10%	30%	60%	70%	30%

Forecast for Thursday 25 Jul 2024

Weather: Dull to start on Thursday as early mist and fog shrouds the hills. This will lift through morning to allow some brightness ahead of heavy showers developing through afternoon. Showers becoming a little more frequent later in the day and the odd rumble of thunder is possible.

Chance of cloud-free hill tops above 700m: No chance initially, improving to 70%.

Low cloud and visibility: Extensive and persistent cloud above 200-300m in the morning, lifting and breaking to leave summits cloud free by early afternoon. Rain showers will obscure neighbouring slopes at times later in the day.

Freezing Level*	2300m	2200m	2100m	2300m	2200m	2100m	2000m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Be aware of rapidly deteriorating conditions through afternoon as showers arrive from the west.

Forecast for Friday 26 Jul 2024

Weather: Westerly winds bring often clear skies early in the day with cloud building by afternoon, perhaps allowing some showers to develop although these likely well scattered and short lived.

Maximum wind: West 20-25mph.

Chance of cloud-free hill tops above 700m: 80%.

Low cloud and visibility: Very little if any cloud below summit level away from passing showers. Excellent visibility although any sharp showers may temporarily obscure neighbouring slopes.

Temperature: **Valleys:** 10 Celsius rising to 15 Celsius.
At 700m: 7 Celsius rising to 10 Celsius.
Freezing level: Well above summits.
